

I am a third-year Computer Science student with a strong passion for exploring emerging technologies, including machine learning, artificial intelligence, cybersecurity, and data science as well as interest in Consulting and problem-solving. I am also passionate in finding ways to link technology to other aspects of the world. Committed to continuous learning and skill development, I seek opportunities to gain hands-on experience and expand my knowledge across various areas of computer science. Known for being punctual, reliable, and proactive, I approach challenges with a growth mindset and a strong sense of integrity. I am eager to contribute to organizations that prioritize creativity, excellence, and impactful solutions, and I am confident in my ability to thrive in dynamic and innovative environments.

Skills

Technical Skills

Programming Languages: Python, C++, C#, Java, PHP, SQL, HTML, C, JavaScript, CSS, LaTeX

Tools & Technologies: Git/GitHub, Linux commands, Davinci Resolve, Draw.io, Canva, MS Azure

Software: Microsoft Office Suite

Soft Skills

Problem-solving | Critical thinking | Communication | Time management | Teamwork | Interpersonal skills | Leadership | Project management | Creativity | Curiosity | Logical reasoning | Technical troubleshooting | Attention to detail | Mathematics and analytical problem-solving

Education

University of the Witwatersrand

BSc. Computer Science

King David Linksfield Highschool

Afrikaans | English | Math (pure) | Business Studies | Consumer Studies | Computer Technology Applications | Life Orientation

Experience

FNB – POP Business Unit

[July 2026]

Vacation Work Intern

Developed an AI-powered enterprise solution to address operational challenges, applying modern software engineering principles and AI-assisted development.

Collaborated in an agile team using the BMAD methodology to analyse requirements, design solutions, and deliver a functional MVP.

Built and integrated backend services using Java 21, Spring Boot, Spring Security, REST APIs, and AI technologies including GPT-4o Vision.

Leveraged Kiro and GitHub Copilot to accelerate development, improve productivity, and focus on solution architecture, integration, and business value.

SourceFin – Credit Intelligence & Digital Transformation Internship

[July 2026]

Intern

Collaborated with the executive team and stakeholders to analyse existing credit approval and post-deal workflows.

Participated in business strategy and requirements gathering meetings to identify operational bottlenecks and opportunities for digital transformation.

Designed and developed a web-based Credit Committee Management System to streamline credit committee processes, approvals, documentation, and reporting.

Contributed to the design of an AI-powered Post-Deal Credit Intelligence Platform, enabling automated monitoring of covenant compliance, financial performance, and portfolio risk.

Created interactive dashboards, workflow visualisations, and system prototypes to demonstrate proposed functionality.

Presented the final solution and implementation roadmap to SourceFin Deal Team and executives, outlining the business value and future development strategy.

Visa Case Competition – Finalist

[March 2026]

Intern

Selected as a finalist in a competitive national case competition

Developed a Customer Value Proposition (CVP) for a South African credit card

Analysed local and global market offerings to identify gaps and opportunities

Proposed a customer-focused, digital-first solution aligned with market needs

Delivered structured, data-driven recommendations to a panel of judges

Quantify Your Future - Nedbank | Standard Bank | FirstRand | Absa | FNB

[January 2026 – February 2026]

Intern

Acquired real-world work experience through projects with Absa, FirstRand, FNB, Nedbank and Standard Bank

Gained hands-on exposure to data analysis including framing, exploration, interpretation, modelling and visualisation

Strengthened key professional skills, including critical thinking, creativity, collaboration, and communication.

Collaborated on team-based projects facilitated by leading financial institutions, applying data-driven solutions

SANReN Cybersecurity Challenge

Competed in the national cybersecurity competition with CTF-style challenges, Attack & Defence, API challenge, Wizard Machine Learning challenge, lock-picking, and MATLAB tasks.

Advanced from the qualifier round to the national finals.

Achievements:

- First team ever to finish the Orange CyberDefence API Challenge

- Reached the second wizard in the Wizard Challenge (only two teams achieved this)

- Placed 2nd individually in lock-picking

Developed in cybersecurity problem-solving, teamwork under pressure, and practical digital forensics.

Boston Consulting Group (BCG)

[August – September 2025]

Grow@BCG Case Competition Winner

Collaborated with a diverse team from all over the country to develop AfriGROW, a FinTech platform addressing a R350B SMME funding gap through purchase order financing, mentorship, and AI-powered reporting.

Gained experience in critical thinking, problem-solving under pressure, and delivering innovative solutions to real-world business challenges.

Deloitte

[July 2025]

VIBE participant (Intern)

Selected for Deloitte's VIBE program, focused on high-performing students

Attended workshops and talks across AI, Consulting, Audit, Risk, and Tax

Gained insight into Deloitte's culture, values, and client work

Led a team in a case study challenge - team placed 1st out of 5

Developed leadership, teamwork, and problem-solving skills

Self**Tutor**

[January 2024 – Present]

Tutored matric and high school students to provide academic support across key subjects

Focused on exam preparation and simplifying complex concepts for better understanding

Helped students build confidence and improve performance through personalized guidance

Video Editor

[January 2021 – January 2025]

Worked on projects across school, personal, and client-based contexts, demonstrating creative and technical skills

Experience with Davinci Resolve

Completed video-based projects - samples available upon request

Leadership

University

Leadership of teams for group projects & external internships

Coordinator of the Cyber Interest Group at Wits

High School

Student Leader

Cycling Captain

Extra-curricular activities (involvement in societies, community work etc)

Interest Group**Wits Cyber**

A student-led community focused on cybersecurity, ethical hacking, digital forensics, and cyber defence.

Participated in workshops, seminars, and weekly CTF challenges.

Compete on a leaderboard through weekly CTF releases to qualify for SANReN regional and national stages.

Projects**SourceFin Credit Intelligence Platform**

Designed a full-stack prototype for an AI-enabled credit monitoring platform.

Developed responsive interfaces for dashboard analytics, covenant monitoring, committee workflows, and portfolio insights.

Built interactive demonstrations showcasing risk monitoring and automated reporting.

Produced technical documentation, architecture diagrams, and presentation material for executive stakeholders.

Ubuntu Health

Community Clinic Appointment and Queue Management System

Developed a web-based healthcare platform to help South African community clinics manage appointments, walk-in queues, and patient flow more efficiently.
Implemented features for clinic search, appointment booking, queue status tracking, and patient-facing clinic information.
Worked with a full-stack architecture using React.js, Node.js, Express, and Supabase.
Integrated real clinic facility data to support location-based clinic discovery and filtering.
Contributed to API development, database integration, UI functionality, testing, and CI/CD setup.
Focused on improving healthcare accessibility, reducing patient waiting uncertainty, and supporting clinic staff operations.

Lend A Hand

Mobile App – Connecting Communities through Resource Sharing
Developed a mobile app to link users with surplus resources to those in need via a direct donation/request system
Implemented key features: user registration, item donation & requests, matchmaking system, and donor recognition wall
Utilized Android Studio (Java), PHP API, MySQL database, and OkHttp for networking
Focused on community-driven support and streamlined user experience
Project videos and demo available on request

Kalooki Multiplayer Game

- Developed a multiplayer implementation of the Kalooki card game using JavaScript.
- Implemented client-server networking to synchronize game state between multiple players.
- Designed game logic for deck management, turn handling, meld validation, and scoring.
- Created algorithms to validate legal combinations and enforce official Kalooki rules.
- Built an interactive graphical interface to enhance user experience.
- Worked collaboratively using Git/GitHub and agile development practices

Certifications

AWS Exploring Artificial Intelligence Use Cases & Applications
Cisco Introduction to Modern AI
Matlab Onramp
Mathworks Machine Learning Onramp
Mathworks Simulink Onramp

Volunteering

Volunteer every month to distribute food at the local food distribution centre

Hobbies

Cycling | Video Editing & Recording | Baking | Sound & Lighting | DIY projects

Awards & scholarships/bursaries

Boston Consulting Group (BCG)

GROW@BCG Case Competition – Winner (2025)

SANReN (CSIR)

First team ever to finish the Orange CyberDefence API Challenge
Reached the second wizard in the Wizard Challenge (only two teams achieved this)
Placed 2nd individually in lock-picking

University

Dean's List - 1st Year
Dean's List - 2nd Year
Certificate of Merit - Basic Analysis II
Certificate of Merit - Database Fundamentals II
Certificate of Merit - Computer Networks II
Certificate of Merit - Introduction to Mathematical Statistics II
Golden Key Award Holder
Scholarships: 2024 UNIVERSITY ENTRANCE SCHOLARSHIP
2025 UG -UNIV COUNCIL MERIT SCHOLARSHIP
2026 UG -UNIV COUNCIL MERIT SCHOLARSHIP

High School

Sound & Lighting Honours

Cycling Full Colours

Valedictory:

Sound & Lighting Award

Commendable Progress Award

Selfless Commitment Award

Bronze Academic Award
